### Key features include

- Instant **full-text search** of documents and e-mails.
- Word form search** on 18 languages.
- Support for **LAN** (local network) and removable drives (CD, DVD and others).
- Support for popular formats, document search from MS Office and **PDF** to TXT.
- Searching documents in **archives** ZIP, ACE, RAR and others.
- Searching in Outlook, **Outlook Express**, MS Exchange, Netscape, Thunderbird, PocoMail and **The Bat!** e-mail messages and their attachments.
- Searching in **Lotus Notes** and **Lotus Domino** databases.
- Remote searching** and documents accessing via Internet.
- Full **Unicode support**.
- [And much more...](#)

### Very strong features are

- Indexing and administration takes place in the main (not web-based) environment (a lot more flexible and usable than web-environments of other search tools).
- Very usable to add search functionality on an intranet to search content a company network.
- Easy administration and application of user rights.
- Preview of files in your browser.
- Usage of SSL is possible.
- Very fast index engine!
- Best quality for a low price!

### Easy to customize (for system administrators)

- Easy to customize to company standards for layout (such as adding logo's and so on).
- Very easy to create a search form for searching only one index.
- You can add pre-defined queries to hyperlinks on an intranet.

All of these makes Archivarius 3000 convenient instrument for all who work with text documents, e-mails and their archives.

The program has a multilingual interface. Presently available are: English, German, French, Spanish, Italian, Dutch, Greek, Swedish, Albanian, Czech, Croatian, Hungarian, Romanian, Polish, Turkish. It's possible to do context document search in English, German, Spanish, French, Czech, Dutch, Greek, Hungarian, Italian, Portuguese, Russian, Swedish, Bulgarian, Danish, Ukrainian and Belarusian.

Keywords: Document Search Engine, Desktop Search Engine, PDF Search Engine, Outlook Search Engine, Instant Search Engine.

### 10 key advantages

Ten key advantages of Archivarius 3000 compared to similar programmes:

#### Full Unicode support

Due to full Unicode support, Archivarius 3000 allows correct search in multilingual documents. For instance, a Greek-German bilingual document can only be handled in Unicode, otherwise

Greek symbols and German diacritics would be lost. File names are also in Unicode, which enable correct handling of Asian documents (Japanese, Chinese, Korean).

- 2 Over 110 different encodings**  
These include all European (e. g. Win-1252, DOS-850), all Cyrillic (KOI8-R, DOS-866), all Greek, Chinese, Japanese, and Korean ones. Even rare encodings are supported: Kazakh, Armenian, Georgian, Thai, Tibetan, etc.
- 3 Over 40 document types**  
Everything from DOC and PDF to NG (Norton Guide) and W&D (Word and Deed).
- 4 All widespread compressing formats**  
Everything from ZIP and RAR to ARJ and ZOO. Moreover, Archivarius 3000 can unpack these **without use** of any external programmes.
- 5 Many popular e-mail systems**  
Archivarius 3000 searches not only e-mail messages, but also **attachments**, including **compressed ones**. The following formats are supported: Outlook, Outlook Express, The Bat!, PocoMail, Netscape, Mozilla, Firefox, and those that are compatible.
- 6 Popular instant messengers**  
Archivarius 3000 allows to search ICQ, Odigo and Miranda message bases.
- 7 Multilingual interface with full Unicode support**  
Archivarius 3000 has a multilingual interface, including English, German, French and **other languages**. And as Unicode interface is also supported, it is now possible to use, for instance, Armenian or Greek interface language on a computer with a German Windows version. If all the fonts are available and the operating system supports Unicode, this should work out.
- 8 Word form search in 18 languages**  
Morphological search is available for English, German, Italian, Spanish, French, Russian, Ukrainian, Belarusian, Czech, Danish, Dutch, Greek, Portuguese, Polish, Bulgarian, Croatian, Hungarian, and Swedish languages. That makes up to 18 morphology analysis modules. See also: [Why Morphology?](#)
- 9 Server mode and remote access**  
Server mode allows you to **search remotely** and have **remote access to your documents** through any browser (f. i., Internet Explorer). This mode can be switched on with a single mouse click.
- 10 Low price, high quality**  
Archivarius 3000 costs less than other similar programmes. And considering the features listed above, it is clear that you get **best quality at the lowest price**. See also: [Pricelist](#).

**Archivarius 3000**  
will find the gist!
