## Archivarius 3000

### Instant full-text search of documents and e-mail in 18 languages

Archivarius 3000 is the system which understands natural language queries (English, German, Spanish, French for example). Documents can be searched by keyword or using query language, the same like in Internet search engines. While searching, the program automatically generates all forms of words, which provide full-text documents search in 18 languages.

### Support for LAN (local network) and removable drives (CD, DVD and others)

While indexing documents and e-mail, Archivarius 3000 will extract and save full information about them. During search, even if document is not physically accessible, Archivarius 3000 will find it by keywords and determine on which disk the required file is located.

### Handling large volumes of documents and e-mail

Archivarius 3000 is built to handle rapidly growing document and e-mail flow with no hassle. You can index thousands of documents and messages daily and still you won't see any significant slowdown while searching and accessing them; there is no need for constant reducing number of documents and messages in your folders in order to make it running faster.

### Support for popular documents

Archivarius 3000 understands the following document formats:

- 1C:Enterprise, External Reports (.ert)
- 1C:Enterprise, Moxcel Spreadsheets (.mxl)
- Adobe Acrobat Reader (.pdf)
- Adobe PageMaker 4.0, 5.0, 6.0, 6.5 (.pm4, .pm5, pm6, .p65, .pmd)
- ChiWriter (.chi)
- Comma Separated Values (.csv)
- Compressed HTML (.chm)
- Corel Word Perfect (.wpd)
- DjVu book with text layer (.djv, .djvu)
- Embiid Reader book (.ubk, .ebk)
- Hangul Word Processor (.hwp)
- Help files (.hlp)
- HieBook book (.kml)
- Hyper Text Markup Language (.htm, .html)
- IBM Final Form Text (.fft)
- IBM Lotus 1-2-3 Spreadsheets (.wk1, .wk2, .wk3, .wk4, .wks)
- IBM Lotus Ami Pro (.sam)
- IBM Revisable Form Text (.rft)
- InfoSelect data file (.wd)
- Internet Location (.url)
- Microsoft Excel 2/3/4/5/95/97/2000/XP/2003 (.xls, .xlw)
- Microsoft InkWriter (.pwi)
- Microsoft Power Point (.ppt)
- Microsoft Word (.doc)
- Microsoft Word for Macintosh (.mcw)
- Microsoft Word templates (.dot)
- Microsoft Works databases (.wdb)
- Microsoft Works documents (.wps)
- Microsoft Works spreadsheets (.wks, .xlr)
- Microsoft Write (.wri)
- MIME HTML (.mht)
- MIME mail (.eml)
- Mirabilis ICQ Chat (.cht)
- Norton Guide database (.ng)

- Outlook message (.msg)
- Palm Database (.pdb)
- Plain Text (.txt, .asc, .lex)
- PROMPT translator (.std)
- Psion TCR book (.tcr)
- Psion ZVR book (.zvr)
- Rich Text Format (.rtf)
- Squish message base (.sqd)
- StarWriter documents (3.0/4.0/5.0) (.sdw)
- The Bat! mail archive (.tbk)
- TRichView documents (.rvf)
- WinOrganizer databases (.gso)
- Wjissoft CyberArticle book (.book)
- Wjjssoft Mybase database (.nyf)
- Word and Deed (.w&d)
- XML Extensible Markup Language (.xml)
- Zinio Reader magazine (.zno)

## Support for popular e-mail formats

Archivarius 3000 understands the following e-mail messages:

- Becky! mailbox
- E-mail message (.eml, .msg)
- Eudora mailbox
- Firebird mailbox
- Firefox mailbox
- Forté Agent mailbox
- IBM Lotus Notes/Domino (.nsf)
- Microsoft Exchange 95/97/98/2000/2001/2002/2003 (.ost)
- Microsoft Outlook 97/98/2000/2002(XP)/2003 (.pst)
- Microsoft Outlook Express (.dbx)
- Mozilla mailbox
- Netscape mailbox
- Opera 5/6/7/8/9 (.mbs)
- PocoMail mailbox
- The Bat! (.msb, .tbb, .tbk)
- Thunderbird mailbox
- Unix mailbox (.mbx, .mbs)

Searching in e-mail messages attachments is also supported.

## Support for popular Internet messenger formats

- MSN Messenger
- Mirabilis ICQ
- Miranda IM
- Odigo IM

## Search in popular archives

Archivarius 3000 supports searches in the following type of archives:

- - SFX AD01
- - SFX ARDI 1
- - SFX ARDI 2

Thus Archivarius 3000 contains own module for unpacking all archives. This means that presence of external archivers is not required.

### Remote searching and documents accessing via Internet

Remote search server feature allows a search and retrieval of documents with another computer via network using any browser (for example Microsoft Internet Explorer). With them you can search, overview found fragments and download or send via e-mail found documents using usual web browser even when you are out of home or office.

**Archivarius 3000**  
will find the gist!
